

# Creating a centre of excellence for Consumer Healthcare in Weybridge

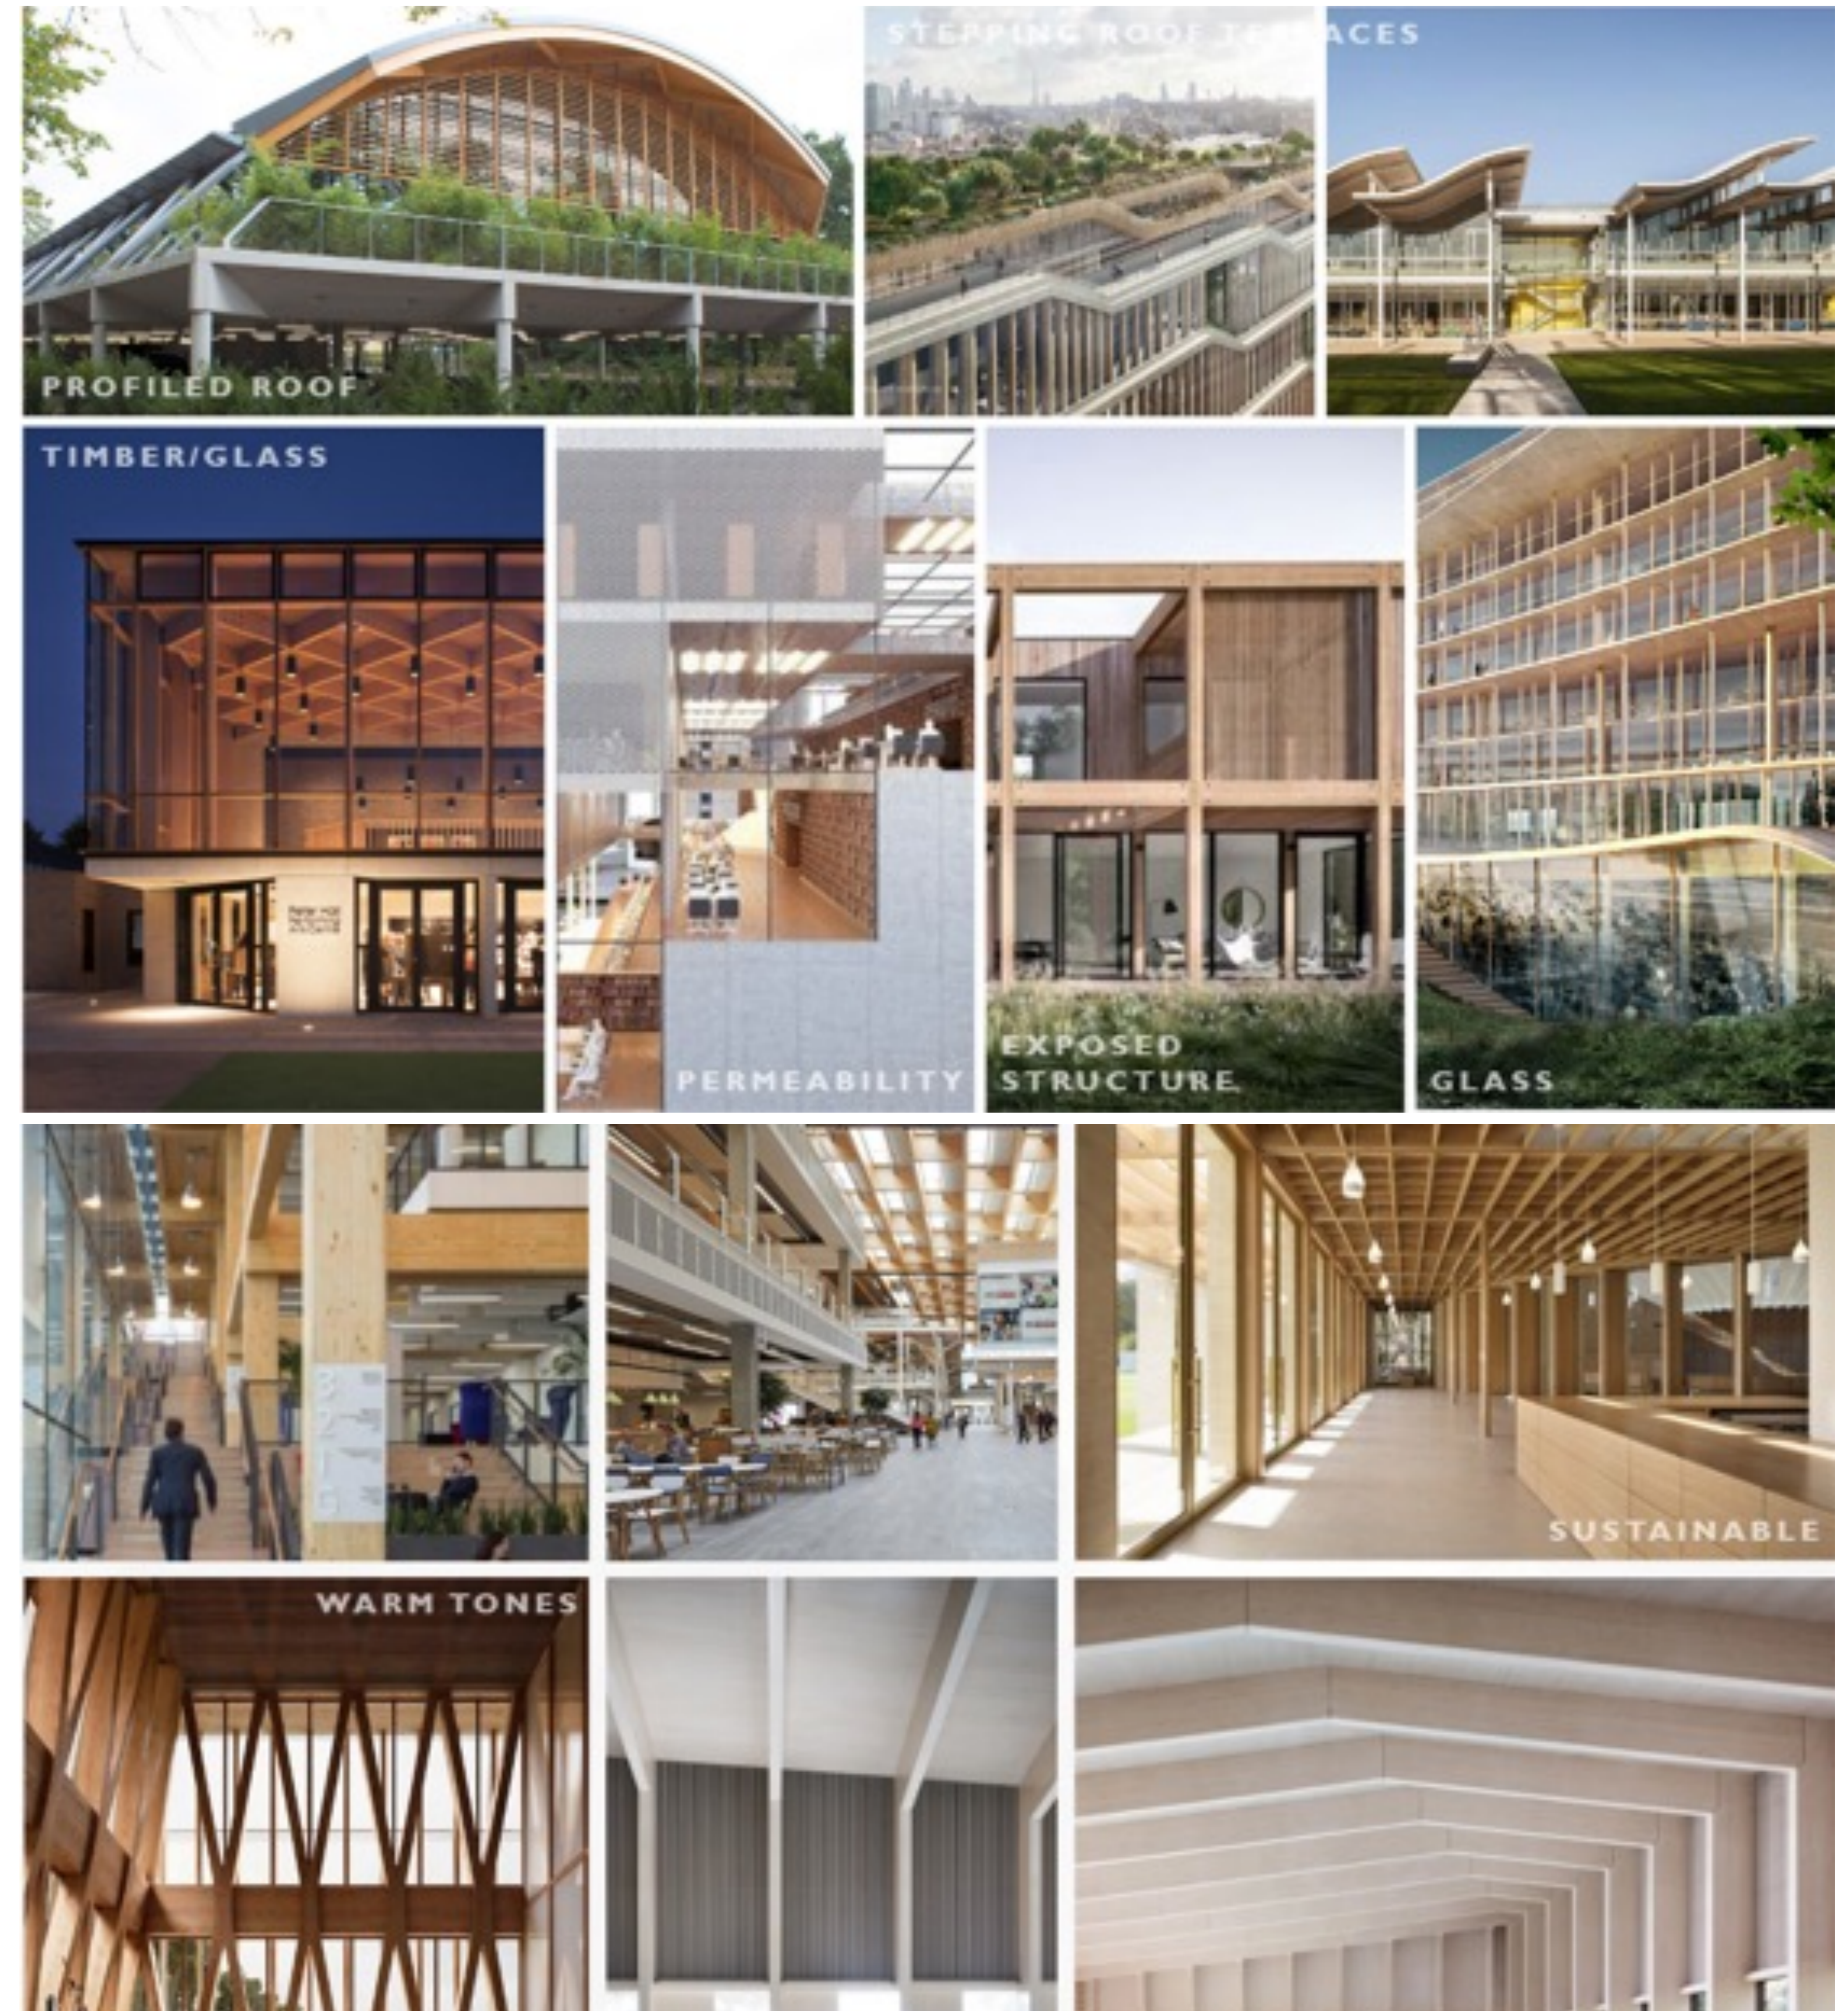

## Design

The proposed approach is to create a coherent overall development where the architectural detailing will contribute to a strong sense of place.

We are carefully considering what makes a place pleasant to work in and live near. The proposed appearance for the redevelopment has emerged as a result of a detailed review of both the site and wider area's history.

The proposed building will be a maximum of four storeys in height, which is comparable to existing premises at The Heights, including the adjacent P&G and Sony offices.

The building will be an impressive sustainable structure encapsulating warm timber tones paired with glass and ample planting.

The learnings from the coronavirus pandemic have allowed us to re-blend the office environment away from predominantly individual work orientated layouts and towards a variety of spaces that foster collaboration and interaction.
